

I do hereby inform you about an accident that took place on 21/06/2017, around 02:00 – 02:30hrs. in the city of Iasi, Romania, during my deployment as a Text removed – justification 4 for the EBCG Agency – “Frontex”. On the above-cited time and date me and my colleague – Text Removed - Justification 1, 4 – who had just arrived in Iasi on 20/06/2017 around 22:00, we were returning back to the rented apartments we are staying in from dinner.

As we were walking down the street, opposite of us, we saw 2 young Caucasian males, around the age of 22-27 years old, who were also walking and were moving towards us. Their behaviour suggested that they might be under the influence of alcohol or narcotic substances.

Considering the abovementioned neither I, nor Text Removed - Justification 1, 4 was trying to provoke or to look for whatever type of contact with those persons, in order to avoid whatever kind of situation arousal, or tension escalation. To avoid conflict from happening in general. Even though, at the moment in which me and Text Removed - Justification 1, 4 passed these individuals and turned towards the entry of the block in which I’m staying in, one of those individuals started to walk behind us and he was speaking something we weren’t able to understand because he was talking in Romanian language. I turned myself towards that individual who was acting in an arrogant and aggressive way and it appeared that his sole intention was to try to get me and Text Removed - Justification 1, 4 involved in a brawl by acting that way. That same person reached his right hand towards me in a way, inviting me to shake hands with him. I did refuse to shake hands with him by saying that I’m not willing to do so and by telling him that I’m not good with handshakes in general, explaining it in a very easy to be comprehended way in English. That’s when that same individual said that we are not Romanians and started to laugh, while at the same time he reached with his right hand behind his back and when I was able to see his hand again, I saw that he had his grasp around a “Butterfly” type of knife, which he used in an attempt to stab me, going for my rib cage, the diaphragm area. The tip of the blade bended upon getting in contact with my rib cage, making the knife appear the way it is when unfolded. Immediately after that me and Text Removed - Justification 1, 4 identified ourselves, in very easy to be comprehended way, as police officers. Upon the hearing that, the two other individuals, started to look uneasy by the news and started babbling unclear in Romanian, as they were drawing away from us and the site.

This is all that there is which relates to the case.

I’m unharmed and in good physical and mental condition. No medical attention was needed or was provided to me due to the fact that none was required.

Text Removed - Justification 2.
