Dear 

In response to your letter ref: 892714, I can confirm that we indeed had concerns about WAADI and our NEN4400 certification in relation to the contract. We have discussed these with our subcontractor Palantir, and solved the matter. This will no longer prevent us from taking next steps.

So in reply to you specific question I can answer the following:

1. Willingness to accept renewal of Palantir maintenance via a Purchase Order: Yes, we are willing to accommodate that;
2. Acceptance of the RFO for services required this year: Yes, although the governance to the team should be described differently, to be discussed;
3. Survival clause: This can be done;
4. Extension of the Framework Contract: Yes, Capgemini is willing to extend the contract;
5. Invoicing SC-5: Yes, since the issues are solved, we will invoice the services as soon as possible.

We are looking forward to a fruitful co-operation with Europol.

Yours sincerely,
